**Mononykus and Birds: Methods and Evidence**

Mononykus within birds (and therefore in the context of dinosaurs) shows "how willing some people are to be deceived by convergence" Without claiming to be the ultimate truth, our methods reject a priori assumptions about how evolution works in specific cases and peremptory assertions about the relation- ships and origin of birds

**The evolution of flight in bats: a novel hypothesis**

Birds and bats, being the only extant vertebrates capable of powered flight, have developed highly specialised mor-phologies to achieve it It is, perhaps, surprising how much the skeletal anatomy and flight mechanics of birds and bats differ The bat wing (patagium) is formed by a series of skin membranes extending between elongated fingers of the
