**Chapter 12: More About Regression**

$y = ax^p$  This is a power model of the form  $y = ax^p$  with  $a = \pi/4$  and  $p = 2$  Although a power model of the form  $y = ax^p$  describes the relationship between  $x$  and  $y$  in this setting, there is a linear relationship between  $x^p$  and  $y$  If we transform the values of the explanatory variable  $x$  by raising them to the  $p$  power, and graph the points  $(x^p, y)$
